

AI Interview Platform Dashboard Layout

Comprehensive dashboard layout recommendation for the AI interview platform. The layout is optimized for a dark-mode-first, developer-oriented, AI-tool aesthetic.

```
-----  
| Welcome Banner |  
-----  
| Score | Interviews | Streak | Communication |  
-----  
| Continue Practice (Large Primary Card) |  
-----  
| Strong Areas | Weak Areas |  
-----  
| Performance Trend Chart |  
-----  
| Recently Attempted Interviews |  
-----
```

1. Welcome Banner

Purpose: Establishes context immediately and gives the dashboard personality.

Position: Top full-width section.

Recommended Content:

- Greeting ("Good evening, Addy.")
- Target role ("Frontend Engineer")
- Practice recommendation summary
- Primary CTA button ("Start Interview")
- Secondary CTA ("Continue Last Session")

Visual Style:

- Slightly elevated card
- Subtle gradient overlay
- Large typography
- Minimal clutter

2. Continue Practice Card

Purpose: Primary actionable AI-driven section.

Position: Large center card directly below stats.

Recommended Content:

- Recommended interview topic
- Difficulty level
- Estimated duration
- Focus areas
- AI-generated recommendation reasoning
- Start Interview button

Example:

- React Performance Optimization
- Difficulty: Medium
- Focus Areas: Memoization, Rendering, useCallback

Visual Importance:

This should be the largest and most visually dominant dashboard card.

3. Strong Areas Card

Purpose: Reinforces positive progress and motivates continued practice.

Position: Left half of a dual-card row.

Recommended Content:

- Top performing subjects
- Skill confidence percentages
- Communication strengths
- AI-generated praise summary

Example:

- React Fundamentals
- Async JavaScript
- API Design

Suggested Visuals:

- Green progress indicators
 - Small upward trend icons
-

4. Weak Areas Card

Purpose: Provides focused improvement guidance.

Position: Right half beside Strong Areas card.

Recommended Content:

- Weakest technical topics
- Confidence breakdown
- Communication issues
- Suggested practice paths

Example:

- SQL joins
- System scalability
- React reconciliation

Suggested Visuals:

- Neutral/red indicators
 - Small recommendation tags
-

5. Performance Trend Chart

Purpose: Shows long-term measurable progress.

Position: Full-width section below strong/weak area cards.

Recommended Metrics:

- Technical score trend
- Communication score trend
- Confidence trend

- Interview completion frequency

Recommended Style:

- Single clean line chart
- Dark background
- Minimal gridlines
- Smooth curves

Important:

Avoid dashboard overload with excessive charts.

6. Recently Attempted Interviews

Purpose: Gives users quick access to prior sessions.

Position: Bottom dashboard section.

Recommended Layout:

- Table or stacked cards
- Interview role
- Score
- Duration
- Date
- View Report button

Example:

Frontend Engineer | 8.2/10 | 27 min | View Report

Suggested Features:

- Replay transcript
 - Resume evaluation
 - Download feedback report
-

Design Language Recommendations

Recommended Visual Language:

- Dark-mode-first design
- Muted grayscale palette with subtle accent color
- Minimal shadows
- Rounded but restrained card corners
- Calm typography hierarchy
- AI/developer-tool aesthetic inspired by Linear, Vercel, and ChatGPT
